Summary

Full-Stack Developer (BCA) focused on **TypeScript and Node.js** back-end services — REST APIs, decoupled/asynchronous service architectures (Redis, BullMQ), and both **SQL (PostgreSQL) and NoSQL (MongoDB)** data layers with query optimization. Experienced with unit testing in CI, Docker, and GitHub Actions. Moving into **NestJS microservices** and cloud-native deployment; strong debugging and clear communication backed by a 2.5-year high-accountability operations background.

Technical Skills

Languages	TypeScript, JavaScript (ES6+), Python, SQL
Backend & APIs	Node.js, Express.js, RESTful APIs, microservice / decoupled service design, asynchronous processing (Redis, BullMQ), JWT & RBAC auth
Databases	PostgreSQL (SQL), MongoDB (NoSQL), Supabase (Row-Level Security), schema design, indexing & query optimization
Testing & Practices	Unit testing (Vitest), CI testing, Agile, code reviews, debugging, Git
DevOps & Cloud	Docker, Docker Compose, GitHub Actions (CI/CD), Vercel, Render, Linux/Bash, Postman
Frontend	React, Vite, Tailwind CSS, responsive UI, REST integration

Projects

ScribeOS — Decoupled SaaS Backend *Live* | *Code*

Node.js · Express · MongoDB · Redis · BullMQ · REST

- Designed a decoupled backend — a REST API plus a separate Redis/BullMQ worker service — so long-running processing runs out-of-band and the API stays responsive, with exponential-backoff retries and dead-letter handling.
- Built on a MongoDB (NoSQL) data layer with structured processing and token/cost tracking per request.

Trekking Community & Booking Platform *Live* | *Code*

TypeScript · React · PostgreSQL · Supabase · Vercel Serverless

- Built a full-stack platform in **TypeScript** on a normalized **PostgreSQL (SQL)** schema with database-level Row-Level Security and optimized queries.
- Automated unit and integration tests run on every push via CI, catching regressions before deploy.

Gov-Dash — Full-Stack Web Application *Live* | *Code*

React · Node.js · Express · MongoDB · JWT · Docker · CI/CD

- Built a React front end over a secure REST API with multi-tier JWT/RBAC authentication across citizen and admin roles.
- Containerized services with multi-stage Docker builds and automated deployments via GitHub Actions for reproducible releases.

Experience

Starbucks India *December 2022 – June 2025*

Barista Trainer *Pune, India*

- Trained and mentored 3+ new staff on beverage routines, hygiene protocols, and POS workflows.
- Handled 100+ transactions per shift with zero cash-reconciliation discrepancies across a 2.5-year tenure.
- De-escalated customer complaints during peak hours while maintaining service throughput.

Education

Bachelor of Computer Applications (BCA) *2023 – 2026*

Dr. Vishwanath Karad MIT World Peace University *Pune, India*

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Development, Operating Systems

Certifications

Data Science Essentials with Python — Cisco Networking Academy
