SUMMARY

Data analyst with end-to-end delivery experience: SQL and Python analysis of 1.3M+ loan records, Power BI and Tableau executive dashboards, and a deployed machine-learning default-prediction app (Streamlit) with large-language-model (LLM) plain-English explanations. Surfaced \$4.06B in at-risk capital (21.6% of portfolio) and lifted default detection from 7% to ~60% through cost-based threshold tuning.

SKILLS

- **Languages & Data:** SQL (joins, CTEs, window functions, subqueries, aggregations), Python (pandas, NumPy), Advanced Excel
- **Machine Learning & AI:** scikit-learn, model training & evaluation (precision, recall, ROC-AUC), LLM integration (Groq), model deployment (Streamlit, API integration)
- **BI & Visualization:** Power BI (DAX), Tableau, Qlik, Matplotlib, Plotly, dashboards, KPI reporting
- **Workflow:** data cleaning & validation, EDA, statistics, Git, Jupyter, Streamlit, REST APIs

PROJECTS

AI Loan-Default Predictor — Python, scikit-learn, Streamlit, LLM · *live app*

- Trained a logistic-regression model on 1.3M Lending Club loans (ROC-AUC 0.70); tuned the classification threshold on expected-loss trade-offs, raising defaulter recall from 7% to ~60% (at ~31% precision).
- Deployed as a live Streamlit app with an LLM (Llama 3.3 via Groq) that explains each prediction and recommends an action.

Lending Club Credit-Risk Analysis — Python, pandas, Power BI, Tableau

- Cleaned and analyzed 1.3M+ loan records, quantifying \$4.06B (21.6%) of capital exposed to default risk.
- Diagnosed default rates climbing 6% to 50% across risk grades, informing lending recommendations.

Starbucks Store Performance — Power BI, SQL, DAX

- Diagnosed a 5% revenue decline as a 12% footfall drop masked by an 8% price rise, isolated to 2 of 5 stores; presented it in an executive dashboard.

EXPERIENCE

Barista Trainer — Starbucks India, Pune · Dec 2022 – Jun 2025

- Ran high-volume POS operations across 100+ transactions per shift with zero cash-handling discrepancies over a 2.5-year tenure.
- Trained and onboarded 3+ new team members; developed hands-on business intuition for what drives footfall and sales.

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Vishwanath Karad MIT World Peace University, Pune
