

NIRMALA CHOUDHARY

Data Analyst · Power BI · SQL · Python · Data Visualization

nirmalachoudharyu@gmail.com · +91 9322730578 · Pune, India · github.com/nikita1-pixel · linkedin.com/in/nirmalachoudharyou

SUMMARY

Data Analyst who learns by building — I built and **deployed a live job-market analytics dashboard** and two end-to-end **Power BI** case studies on 45,000+ and 10,000+ records. I take messy data from raw to decision: pull it via REST APIs, query it in **SQL**, clean and analyze it with **Python/pandas**, and turn it into clear, decision-ready dashboards. **BCA graduate (2026)**, backed by 2.5 years in fast-paced, customer-facing work that sharpened my business and customer sense. Completed the **Deloitte Data Analytics Job Simulation**. Open to Data Analyst roles in Pune (hybrid/remote).

TECHNICAL SKILLS

Business Intelligence: Power BI (Power Query ETL, DAX, dimensional modeling / star schema, conditional formatting, KPI dashboards)

Languages & Analysis: Python, pandas, SQL (INNER/LEFT joins, multi-table chain joins, GROUP BY, HAVING, subqueries, window functions), EDA, data cleaning

Visualization: Matplotlib, Plotly, Streamlit (interactive dashboards), Microsoft Excel (pivot tables, charts), IBM Cognos, Jupyter

Statistics: descriptive stats (mean/median, standard deviation), outlier detection (IQR, z-score)

Tools: Git/GitHub, REST APIs (requests, JSON), virtual environments, pytest, PEP 8

PROJECTS

Remote Job Market Analyzer · Python · REST API · pandas · Plotly · Streamlit (Deployed Live)

- Built and **deployed a live interactive web dashboard** that pulls real-time remote-job data from the Remotevite REST API, processes it with pandas, and visualizes hiring trends with Plotly — with KPI cards, filters, a clickable jobs table, and CSV export

Live: remote-job-market-analyzer.streamlit.app · github.com/nikita1-pixel/remote-job-market-analyzer

Starbucks Store Performance Dashboard · Power BI · Power Query · DAX

- Analyzed **45,000+ transactions** to investigate a regional sales decline; built a Power Query ETL pipeline and DAX measures (CALCULATE, DISTINCTCOUNT, DIVIDE) for year-over-year revenue, units & footfall
- Diagnosed the decline was **concentrated in 2 of 5 stores** and that an 8% price hike masked a ~12% drop in visits; delivered 3 targeted recommendations with conditional-formatted visuals

github.com/nikita1-pixel/starbucks-store-performance

Netflix Content Strategy Dashboard · Power BI · DAX · Dimensional Modeling

- Modeled **10,000+ titles** into a star schema and analyzed catalog by genre, language & rating with DAX measures
- Identified and fixed a **data-integrity bug** (genre-level row duplication inflating counts) using DISTINCTCOUNT

github.com/nikita1-pixel/netflix-content-strategy

Sales & SQL Data Analysis — Olist E-commerce · SQL (SQLite) · Python · pandas · Matplotlib

- Analyzed a **100,000+ order** Brazilian e-commerce dataset; wrote a **3-table chain JOIN** (order items → orders → customers) in SQL to compute revenue by state, visualized with Matplotlib

EXPERIENCE

Barista — Starbucks India

Dec 2022 – Jun 2025 · Pune

- Operated POS systems to process high volumes of daily transactions with accuracy and speed in a fast-paced environment
- Trained and onboarded new team members on preparation standards and service procedures
- Adapted to varied customer needs, consistently maintaining high satisfaction and service quality

CERTIFICATIONS

- Data Analytics Job Simulation** — Deloitte
- Data Visualization & Dashboard Building with Excel and IBM Cognos** — edX (IBM-backed)
- Machine Learning & Deep Learning** — NIT Goa · **Gemini AI for Students** — Google

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Dr. Vishwanath Karad MIT World Peace University, Pune
