

NIRMALA CHOUDHARY

Data Analyst | Python · SQL · Power BI · Tableau

Pune, India (open to relocation) | +91 9322730578 | nirmalachoudhary@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

BCA graduate and Data Analyst, certified in Machine Learning & Deep Learning (NIT Goa). I turn raw data into business impact — cleaned and analysed 1.3M+ loan records to surface \$4.06B in credit-risk exposure, built executive KPI dashboards across five BI tools, and shipped four end-to-end projects including a live-deployed reporting app. Backed by 2.5+ years of stakeholder-facing operations experience; strong on communication, accuracy, and turning ambiguous questions into decision-ready insights.

CORE COMPETENCIES

Data Analysis & Programming: Python (pandas, NumPy, OOP), SQL (INNER/LEFT & multi-table joins, GROUP BY/HAVING, subqueries, window functions), SQLite, EDA, data cleaning & validation

BI & Visualization: Power BI (Power Query, DAX, data modeling), Tableau (published to Tableau Public), Qlik Sense (Qlik Cloud), Apache Superset, IBM Cognos, Plotly, Matplotlib, Streamlit, Advanced Excel (XLOOKUP, INDEX-MATCH, pivot tables)

Statistics & ML: descriptive statistics, outlier detection (IQR, z-score), root cause analysis, Machine Learning & Deep Learning foundations (NIT Goa)

Data Engineering & Tools: REST API integration (JSON), ETL pipelines, automated reporting, Git/GitHub, Jupyter, pytest, Docker (basic)

KEY PROJECTS

Credit-Risk Analysis — Lending Club *Python, pandas, SQL, Tableau, Power BI | 1.3M+ records*

- Cleaned and validated 1.3M+ loan records to zero missing values, excluding 10+ data-leakage fields to build an analysis-ready dataset.
- Quantified \$4.06B (21.6%) of \$18.76B lent as at-risk exposure — default risk rising ~8x across credit grades (6% → 50%).
- Built interactive dashboards in Tableau (published to Tableau Public) and Power BI with KPI cards and risk by grade, term and purpose.

Remote Job Market Analyzer *Python, REST API, pandas, Plotly, Streamlit | deployed live*

- Built and deployed a live Streamlit web app that ingests real-time job-market data via the Remote REST API.
- Delivered an interactive dashboard with filters, KPI cards, a clickable jobs table and CSV export; automated manual data pulls to zero.

Starbucks Store Performance *Power BI, Power Query, DAX, SQL, Qlik | 45,000+ transactions*

- Engineered a Power Query ETL pipeline and DAX KPI measures for year-over-year revenue, footfall and store performance; validated independently in SQL.
- Diagnosed the decline to 2 of 5 stores — an 8% price rise masking a ~12% footfall drop — and delivered 3 targeted recommendations; reproduced in Qlik Cloud.

E-Commerce Sales Analysis — Olist *Python, SQL, SQLite, Matplotlib | 100K+ orders*

- Wrote multi-table (3-table chain) JOINS and window functions (ROW_NUMBER, RANK, LAG) over a 100,000-order database.
- Computed revenue by state, ranked top product categories, and surfaced geographic performance patterns.

PROFESSIONAL EXPERIENCE

Administrative Assistant | AV Corder — Pune *Jun 2025 – Aug 2025*

- Streamlined scheduling and documentation across 20+ recurring weekly tasks, maintained 100% record accuracy, and resolved data discrepancies with cross-functional stakeholders.

Barista | Starbucks India — Pune *Dec 2022 – Jun 2025*

- Processed 100+ transactions per shift with 100% cash-handling accuracy in a fast-paced environment; trained 3+ new team members on service and POS operations.

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Vishwanath Karad MIT World Peace University, Pune

CERTIFICATIONS

Machine Learning & Deep Learning — NIT Goa | Data Analytics Job Simulation — Deloitte | Data Visualization with Excel & IBM Cognos — edX (IBM) | Gemini AI for Students — Google
